

3mL VanishPoint® Syringe

VanishPoint® and Patient Safe® products provide uncompromising safety for clinicians and patients.

Retractable Technologies, Inc. is the manufacturer of VanishPoint® and Patient Safe® safety products. VanishPoint® products virtually eliminate the risk of contaminated needlestick injuries that can transmit HIV, hepatitis (B and C), and many other infectious bloodborne diseases. Patient Safe® syringes are uniquely designed to reduce the risk of bloodstream infections resulting from catheter hub contamination.

VanishPoint® products feature automated retraction. The needle is retracted directly from the patient into the device. The pre-removal activation virtually eliminates exposure to the contaminated needle, effectively reducing the risk of needle stick injury. Once retracted the VanishPoint® needle is safely enclosed within the syringe barrel and is almost impossible to accidentally or purposely expose it again.

With 3 ways to activate and a broader range of sizes than most other brands, SurGuard®3 is the industry's most adaptable safety needle. Add separate thumb and finger grips, unequalled sharpness, and competitive pricing, and you'll understand why we say SurGuard®3 is the one needle that fits every clinician's style.

- 3 modes of activation—thumb, finger, or hard surface
- Separate finger/thumb grips with ridges and nonslip surfaces
- Hub and needle locks for security post activation
- Broad range of sizes
- Firm injection feel
- Sharpest needles among major brands tested*
- 10% sharper than similar needles from Becton, Dickinson and Company
- More comfortable injections for patients

Bottom line: No matter what you're looking for in a needle, you're looking for SurGuard®3.

SOL-MILLENNIUM SNAP SAFETY SYRINGE

These syringes have an integral safety engineered design and bold, easy to read gradations for accurate dose preparation and verification. Syringes with needles are designed for safe injections - hands and fingers remain away from the needle during injection and activation of safety mechanism, aiding in the prevention of needle stick injuries.

BD DUO SAFETY INSULIN PEN NEEDLE

- BD AutoShield™ Duo is the only pen needle that passively covers the front and back needles, eliminating exposure after use.
- Studies show that both ends of a pen needle are contaminated after use, so both ends of the needle require safety features
- Colored shields on both the front and back-end needles provide visual and tactile confirmation of safety
- BD AutoShield™ Duo is the only pen needle that fits every diabetes pen, so you get the highest level of protection - no matter which pen you use

BD BLUNT FILL FILTER NEEDLE

Preparation Through Administration. As a healthcare institution, your objectives are simple: remove conventional needles; provide safety-engineered alternatives; and manage costs.

The BD Blunt Needle family allows you to meet these objectives:

- Low penetration force
- Ease of use
- Reduces access to conventional needles
- Reduces risk of needlesticks
- Lower cost than safety
- SKU reduction
- Manage cost for institution
- Reduced cost for institution
